

Darryl Krakowka is rapidly becoming a champion for the seniors and disabled in Tumbler Ridge. The owner/operator of Shop-Easy has recently renovated his store to create two till lanes that are wheelchair accessible, and currently has two disabled high school students doing a work experience project at his store. One of them graduates this year, and Darryl has committed to hiring him when he is finished school.

These are not the first individuals with disabilities that have been employed by Darryl. He has a history of providing employment to those who live with disabilities. He has also put out the word that he is looking for seniors who would like to work some shorter shifts at the store – and his final word on the subject – “We aren’t doing near enough!” He is a great example of what can be done to include and involve ALL citizens in a community when people care. Bouquets to Darryl!
